

Considering our community's unique blend of talent and resources, Marin high school students are positioned to compete for the college careers of their dreams – with the right training.

The Marin Media Corps immerses students in a professional working environment and fosters their skill and creativity in the production of digital stories about significant events in arts, science, and culture.

With press access to notable events like Ted X Talks, the Bioneers Conference, and the Mill Valley Film Festival, students will learn so much more than video production. So when it comes to picking a college major, Marin Media Corps graduates can make an informed decision – saving time and money.

## What are the costs?

Membership in the Marin Media Corps is \$25/year.

## How many events will my student film?

A minimum of three events per trimester (Spring, Summer or Fall) in order to qualify for credit and free training.

## What kinds of events will my student film?

Events to be covered might include sports, concerts, author readings, plays, candidate debates, workshops – and more.

## What kind of training will my student receive?

All students will receive training in Field Camera and Multi-Camera Event Coverage. Additionally, students can choose from a wide range of monthly workshops – from TV Studio Production to Screenwriting.

## Benefits:

- Professional working environment
- Production Certifications through CMCM
- Press access to Marin's best arts, science and culture
- Events air on Marin TV
- High school credit\*

*\*Offered through Marin Regional Occupational Program*

## Marin Media Corps Scholarship

At the end of the school year, the student who contributes most to their school's own media development can apply to receive a \$500 academic scholarship.
